

Application to participate in the AIM Mathematics Teachers' Circle immersion workshop

to be held at AIM in San Jose, CA

July 27 - July 31, 2015

Thank you for your interest in the AIM Math Teachers' Circle Immersion Workshop, a free residential summer program for middle school math teachers in the San Francisco Bay Area.

Eligibility

To be eligible for the AIM Math Teachers' Circle Immersion Workshop, you must have not previously participated in a residential summer workshop at the American Institute of Mathematics or Berkeley. Preference will be given to candidates who teach mathematics in grades 5-9 in a Bay Area public or private school, and who commit to participating in the AIM Math Teachers' Circle during the upcoming academic year.

Application Process

Applications are evaluated as they are received and will remain open until all places are filled, or until June 1, 2015, whichever comes first. If you would like to confirm your eligibility or ask any application-related questions, please contact Hana Silverstein, hana@aimath.org.

Selection Criteria

Participant selection is based on the degree of interest in becoming engaged in a community of problem solvers and bringing the culture of problem solving into the classrooms. All interested teachers are encouraged to apply, regardless of their mathematical background.

Successful applicants will receive support for hotel and meals during the immersion week.

Statement of Interest

What are your personal and professional goals as a mathematics teacher? Why do you want to participate in the Math Teachers' Circle immersion workshop? What other professional activities do you participate in outside the classroom (if any)?

(Please keep your response between 200 and 500 words.)

Prepare the statement on your local computer and paste into the box below.

Statement:

You will be asked to confirm your information before final submission.
